This game was just. woah. I was not expecting this game to be what it is. First, the game uses it's own launcher, so I don't appear to be playing Half-Life like so many other mods. Second, ACHIEVEMENTS! I love achievments, because it adds a level of official-ness to the game. But lastly, the thing that really stands out is it's usage of GoldSrc, the engine used in the original Half-

Life. The usage of this engine's capabilities, and the level of detail, made me confused as to if it was GoldSrc or Source. Not many game engines can do this, especially one developed in '98. If you have played Half-Life, you need to play this. Now. Click the button above and download it. 10/10 P.S. Did I say to play it now? Oh, right. I didn't.. Pretty cute, without much depth.. Clicker Heroes combined with a shooter :). question can you possiably make a addon for gmod 13 that adds these headcrabs? onto the acutal review i have no idea whats going but install this its fun. Very Fun Game. It's a fun game to play every now and again.. Half-life: Headcrab Hitting Arcade Mode
