its a turn based rpg with simple card mechanics

+great art style

+tutorial is not very long

-its a kind slow for arcade gamers

10/10 a perfect example of "if its not broken don't fix it". With each volume the Friendsims dig deeper into alternia's lore, the narrative becomes more interesting, more of its darkness is touched, and more and more questions are asked about the individual whom we are experiencing this series through. And the question of whether or not this is as loosely canonical to the main game becomes ever harder to answer. Along with how the bleeding hell has the cullbait sunova survived this world XD. lostttt in youuuu

nostalgic game <3 <3. Wish i could play it as the trailer looked interesting. everytime i try i get stuck on a screen with a deer eating grass. No matter how long i wait or what keys I press nothing happens. When i open task manager to force close the game i find i cant click anything and no key commands work. I have to hard reboot my pc for anything to work again.. many physics. Ok, let me go straight to the point, I've also got a big headache (probably increased by the fact that the last minutes of each level of this game (they're all the same, you can only choose between easy normal hard and infinity mode) features colorful asteroids falling down in dozens and make you dizzy).

This game is really so crappy designed and even more crappy programmed.

You basically control a starship and you can only move with WASD controls in a fixed scheme with a Windows 95 background. Stop.

No, you can not fire. You can't do anything but collecting good items and avoiding bad items coming at a gradually increasing speed from above.

You can collect HP, magnets and diamonds; you must avoid death (yeah there's skull and bones floating on screen), asteroid and other ships. Everything does the same damage to you and you can only keep on diving left and right.

Totally pointless game, and artwork and sounds suck too.

Definitely to avoid.

Oh, I forgot to say that some achievements are bugged and stuck to 0% too and this doesn't have trading cards.. and it seems the developers don't even want to fix the missing achievements, so really, negative.. Got a free copy of the game from onlygift.com. It's very hard. Game is good overall, I like it, it's one of the nicest point-and-click adventure games I played, yet it gets only a borderline recommendation, as it also has some rather hard to ignore downsides.

Pros:

-nice noir atmosphere, immersive and cool

-the dialog lines usually manage to avoid being boring or annoying

-interesting enough plot (until the ending)

-Steam Trading Cards and some really nice Steam profile backgrounds

Cons:

- Greta's voice acting is horrendous, no tone change and no inflexions, she sounds... cheap and bored at all time
- typical point-and-click game issues concerning logical matches, like when using a candy wrap to fix a wire
- I can't find out how to make the game run in a window, and permanent full-screen is a bit annoying, to say the least
- no Steam achievements
- comes with the worse type of ending, the cliffhanger "to be continued" ending

This game is a typical representative of the genre of visual novel, as here worked out everything: characters, backgrounds, soundtracks. Sometimes the plot forces you to take very difficult decisions, which then depends on many things.

If you love brave guys who hunt for treasure, then go ahead and purchase this game, it will not let you regret your choice.. The low price is not worth the few minutes of mild entertainment it provides. This game feels like a beta.. art: 10

controls: 10

music: 10

replay: very high

pros: its a bullet hell game and within the series of Gundemonium(takes before the events of the first game), which are side scrollers, this one is vertical. the music is the best of the three games of the series. the art is awesome. even the bosses look badass. you unlock new dolls(characters) adter you beat the game a few time.

cons: like they said, this one is one the hardest of the series.

the game doesn't tell you how to use bombs, which makes the first boss very hard to kill. in order to use bomb, you need the flow bar full and just crash\ram into the "targets" during the boss fight. remember, bombs use one doll.

inshort, if you love the Gundemonium series or hell bullet games, pick this up.. A GAME WHERE YOU CAN SEE YOUR BODY, FEET, AND NECK IN FIRST PERSON

THE FUTURE IS HERE. Worst character pack so far. Mira is somehow balanced, but Iru is underpowered untermensch.. More Neko pls

We need moreee

!!. Memories of a vagabond

What a game, what a game!

I am so happy I did NOT paid for this game!

Ok, Steam gave me 3 trade cards for it, but still....

Memories of a vagabond begins with you as a hero who has to safe his little girl.

She has been caught by some ♥♥♥♥♥♥ who doesn't have anything better to do then to abduct your girl and let you chase him.

You have to choose out of 3 classes (we have never saw that 1 before), and when you die, you will meet Mr. Grimm reaper and he will give you another body (or you want to be stucked with the class you have chosen, it is up to you).

Gameplay is easy: by keyboard or X-box controller (watch out, the buttons are very different compare with Skyrim or other games!).

The graphics reminds me of the old days of Final Fantasy, the music fits with the ambiance of this simple game, the story is fun, but it is so damned short!

WHY O WHY only 3 quests?

God may know why...

Anyway, after 4 hours I have finished the game and I can say, I enjoyed it.

Graphics: 7/10

Sound and music: 7/10

Storyline: 4/10 (it is too short come on peepz come one!)

Total verdict: yeah, thumps up 7/10!. 6/10 - Not great, but it's hard to find simple TD games that aren't in the fantasy or zombie genre.

PROS:

-
- No elves or zombies in sight!
 - Simple, classic style TD game
 - Decent graphics (but not really 16bit style in my opinion)
 - Good music and voice acting
 - Upgrades are explained well

CONS:

- A bit dull and boring to be honest
- Upgrading is going to take forever
- Doesn't really bring anything new to the TD genre
- It wasn't clear that the screen could be scrolled up and down
- Sometimes trying to call the next wave early pauses the game (WTF?)
